

International Course on Micromorphology of Deformation Structures in Quaternary sediments

John Menzies, Brock University, Canada
Birgit Terhorst, Universität Würzburg, Germany
Daniel Jäger, Universität Würzburg, Germany

06. - 08. June 2014 in Würzburg/Germany

The objective of this course is to investigate deformation structures in glacial sediments and landslide deposits. The focus of this Workshop will be on variations in shear stress levels and strain rates within slide masses as well as in glacial sediments. Participants will be instructed in international description methods and systematics. A major part of the course will involve participants working independently with selected thin sections.

Deadline: 15th, February 2014

Registration fee: 150,- € (accommodation not included)
